

Assignment 2 - CITY AND LANDSCAPE: Cross-border Development Slovakia-Austria

The assignment is linked to the international student competition Landscape Forum: "Cross-Border Landscapes Slovakia - Austria", organized in cooperation with LE: NOTRE Institute, ECLAS, SPU Nitra, STU Bratislava and TU Wien. Students can participate in a workshop, which will be in October 2019 at FA STU in Bratislava. The assignment will verify, in cooperation with the Bratislava Municipality, the southern development of Bratislava in the context of the international region Slovakia - Austria and cross-border cooperation. This area has long been a barrier due to the existence of the Iron Curtain. At present, it represents an attractive potential for creating scenarios for the Western development of Bratislava as an area without borders, which is in line with the preparation of the Bratislava Strategic Plan. Students will verify the possibilities of developing the structure of the city and its recreational background in relation to water and green elements in the area, in contact with the surrounding rural settlements. The assignment is open to the landscape and urban concepts with the result of architectural designs.

The assignment is suitable for studios: Urban design, Landscape architecture, Residential and Civic Buildings, Ecological Architecture

Key characteristics: Urban design; architecture; cooperation practice/city; international cooperation; competition
